2WGB chain A
a
Δ = +123.5 Å²
wild type
mutant
probability density
cryptic-site SASA (Å²)
b
wild type
mutant
open frames
mutant 94%
wild type 56%
probability density
cryptic-pocket volume (Å³)
c
D = 0.96
cumulative fraction
cryptic-site SASA (Å²)
d
cryptic-site SASA
pocket volume
druggability (open frames)
non-cryptic volume
backbone RMSD
radius of gyration
helix content
sheet content
